

2023

NEW YORK
ENCOUNTER

For me?!?

IN-PERSON & LIVESTREAMED

SATURDAY
FEB 18, 2023
6:00 PM ET

METROPOLITAN
PAVILION
125 W. 18th St.
New York City

OPEN TO
THE PUBLIC

WWW.NEWYORKENCOUNTER.ORG

A presentation on the James Webb Telescope, its undertaking, and its discovery, with **Stefanie Milam**, James Webb Space Telescope deputy project scientist for planetary science, and **Massimo Robberto**, branch lead of the Near-Infrared Camera of the James Webb Space Telescope, moderated by **Maria Elena Monzani**, lead scientist, Stanford University

Speakers will present some of the latest discoveries and some stunning images obtained by the Webb telescope. They will also speak about the Webb telescope's relevance for the future of astronomy, and how this amazing project began and was implemented. This event will be an occasion to marvel both at the immensity of the universe and at the human ability to explore its origins.
